

OFFLINE -Graphics (FOR A2/B1/B2)

Tasks.

1. You have to draw a rectangular boundary around the screen.
2. You have to write your student id at the upper right corner of the screen outside the boundary .
3. You have to make balloons appear randomly from a different position of the screen. But you have to make sure that the balloons appear and disappear in correct orientation (as mentioned in the class). For example, when the balloons reaches the upper boundary level, only the part within the boundary appears. And of course, the balloons will continuously move upwards.
4. Next, your task is when the user moves the cursor, above the balloons you have to make the balloons disappear.
